

IoT Based Cargo Protection

7PSolutions provides a variety of GPS devices to monitor global supply chains, assets, and driver protection. With cargo theft becoming more sophisticated and increasing their attacks against the supply chain business must take a layered approach to protect their bottom line and protect their brand.

7PSolutions Disposable Cargo Protection a Layered Approach

Call or email to learn about preferred pricing

7PGL530

A powerful tool in cargo theft protection. Initial light sensor provides Alarm of door or carton breach, second light sensor provides alert of tampering or removal.

Optional
magnet holder

7PGL33

Small and covert, utilized as a standalone or secondary device with the 7PGL530. For a layered approach, this secondary device begins tracking after the initial breach.

7PGD100

The first in disposable GPS devices while using a single or layered approach with the 7PGL33. Provides light and validated temperature sensors.
